

CERN

210 Collaborators
As of February 2003

TRACKER

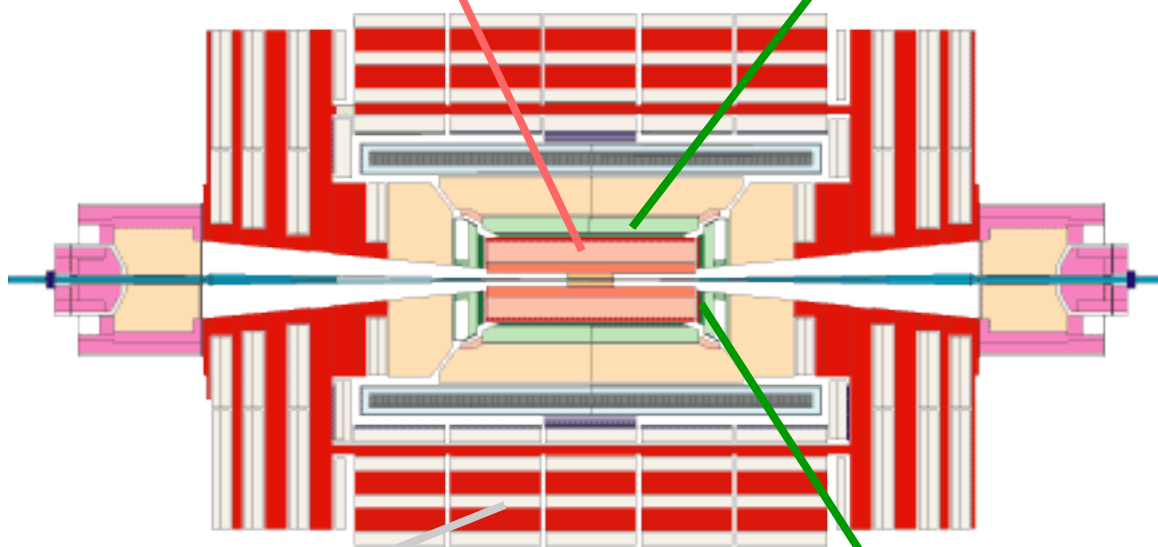

Silicon detectors,
electronics, mechanics,
support structures and
assembly, service systems

ECAL Barrel

Crystal purchase, regional centre,
upper-level readout electronics,
mechanics, assembly and installation

TRIGGER/DAQ

Global trigger, read-out
units, filter units, event
builder, DAQ integration,
detector control system

OFFLINE
COMPUTING

MUON Detector

Barrel drifttube services, and
electronics
Alignment system

MAGNET

Procurement

PRESHOWER

Electronics (front-end,
voltage systems,
monitoring etc.),
prototyping, mechanics
